ABOUT US

We have dealt with Taylors Trailers for in excess of 25 years, they have always produced a well designed, robust trailer. Back up is second to none; I have no hesitation in recommending them to anyone.

Nigel Chippindale | Joint Managing Director

Taylor's Trailers Limited is a family run business. We have been designing and manufacturing high quality trailers, at our premises in West Yorkshire, for over 40 years and have a choice of plant trailers, under the 'Mr Mobile' range, catering for the construction industry plus toilet trailers for the event industry.

We manufacture our own original products, with some of our ideas becoming industry standards.

Our products offer versatile and robust solutions to our customers towing requirements. With customers still using the trailers they bought in the 90's, our products continue to prove their longevity in what is a demanding industry.

Full European Type Approval – ECWVTA giving additional peace of mind for our full range.

Be sure to contact us to see how we can assist you with your future towing requirements.

'Unsurpassed quality, unrivalled reliability'

We offer Taylor's Trailers to our customers with compact excavators, and we use them for our own workshops.

For us it is important that we offer a high quality trailer with our products, a trailer that will support our premium brand.

Taylor's Trailers delivers just that, high quality and a problem free ownership for us and our customers since 1997.

We can highly recommend Taylor's Trailers as your trailer supplier.

Nils Johansen | Volvo Maskin AS

HEAVY DUTY MINI EXCAVATOR TRAILERS

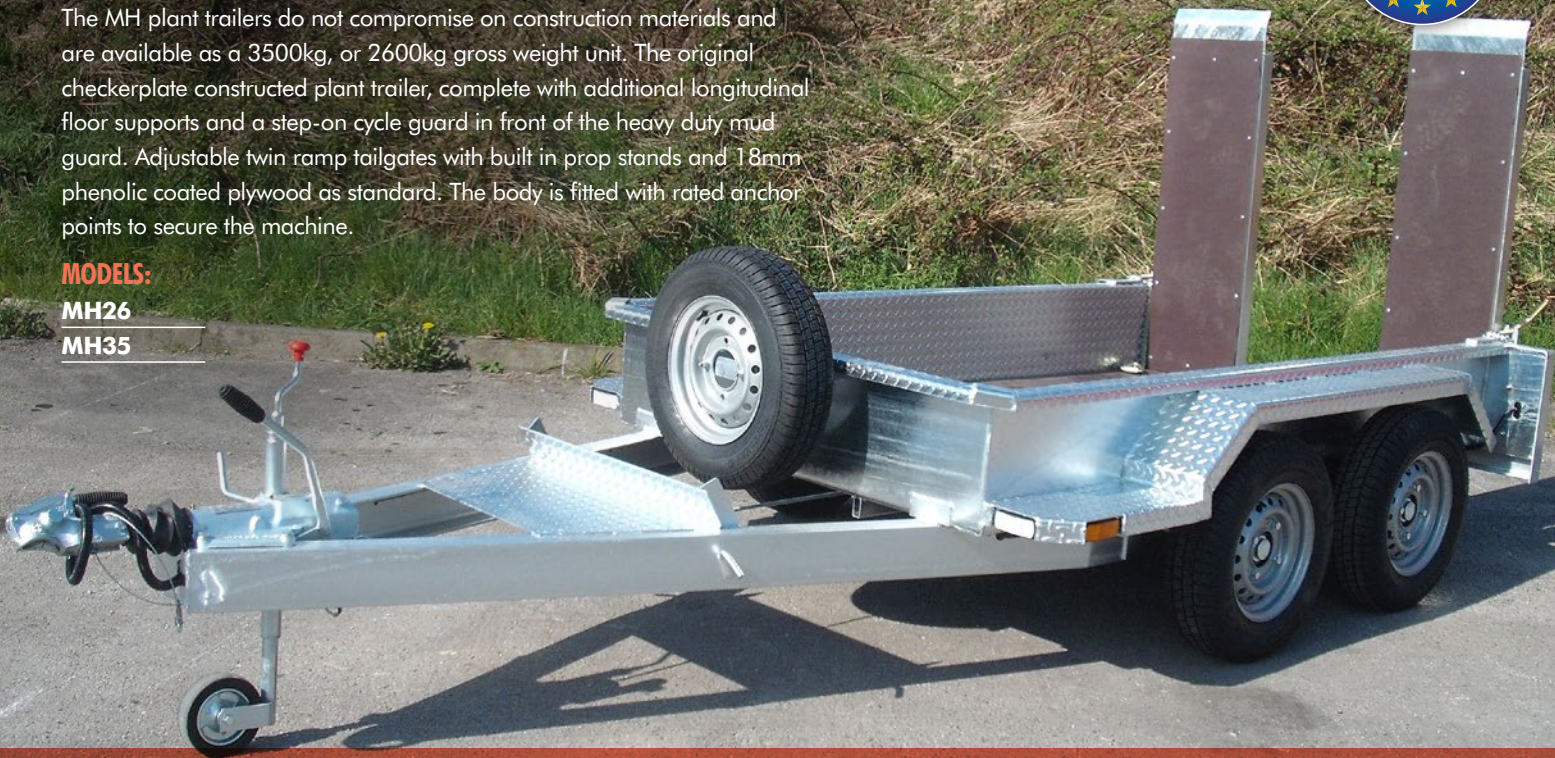

The MH plant trailers do not compromise on construction materials and are available as a 3500kg, or 2600kg gross weight unit. The original checkerplate constructed plant trailer, complete with additional longitudinal floor supports and a step-on cycle guard in front of the heavy duty mud guard. Adjustable twin ramp tailgates with built in prop stands and 18mm phenolic coated plywood as standard. The body is fitted with rated anchor points to secure the machine.

MODELS:

STANDARD MINI EXCAVATOR TRAILERS

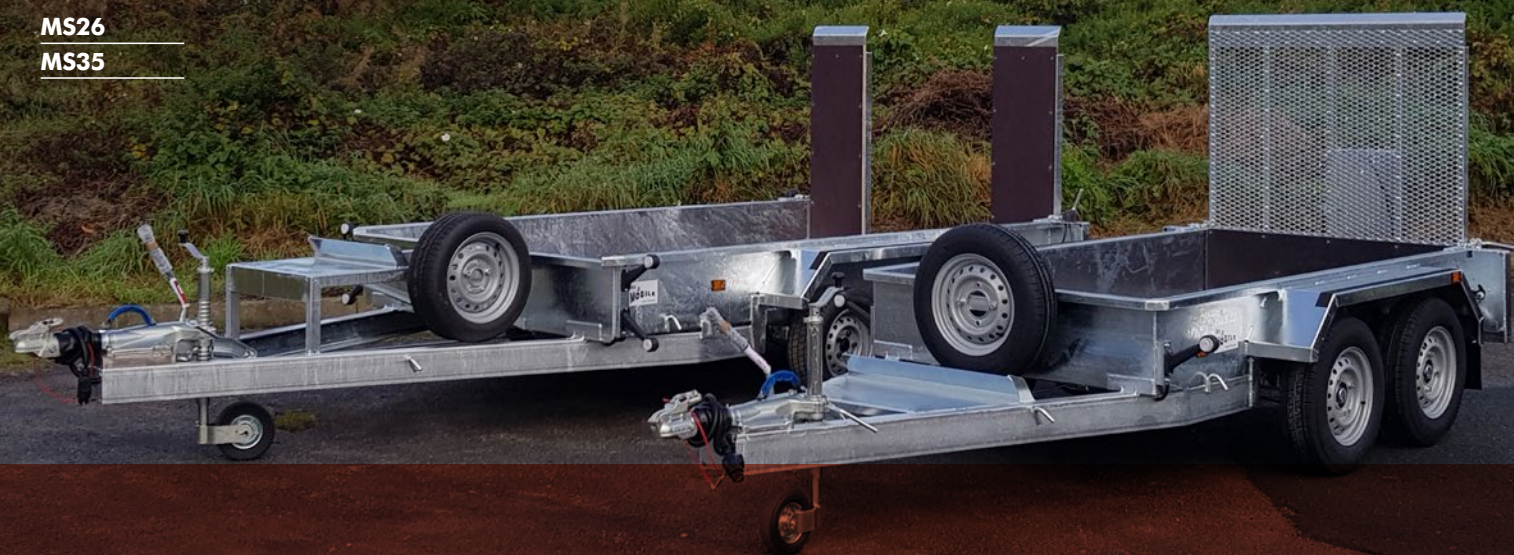

Our standard mini excavator trailers offer a versatile product, with a great lifespan. Supplied to customers within the UK and Europe to carry a wide range of excavators and other products from various manufacturers. Longitudinal floor supports for transporting wheel or drum loads. The MS35 comes with individual adjustable ramp tailgates, whereas the MS26 has a full width partial mesh tailgate with gas strut assistance. Both trailers have 18mm phenolic coated plywood.

TILT-BED TRAILERS

A new addition to enhance our Mr Mobile range of approved plant trailers. We provide an easy to use and versatile trailer that is available with, or without a side kit. The trailer tilts from the drawbar to maximise the potential payload. There are plenty of longitudinal floor supports for wheeled or drum machines. Manual hand pump, a drop down loading ramp and a gross weight of 3500kg.

SINGLE DRUM ROLLER TRAILERS

The single drum roller trailer has been in our product range for many years. Using our original spring loaded drum clamps and a front clamp, the machine can be firmly secured in place. A solid trailer to cope with the rigours of the plant market.

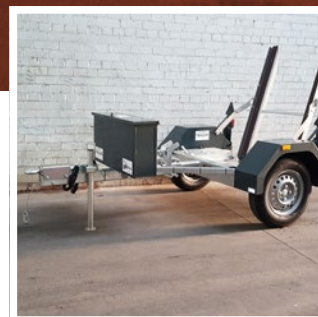

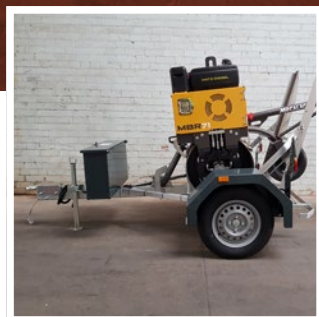

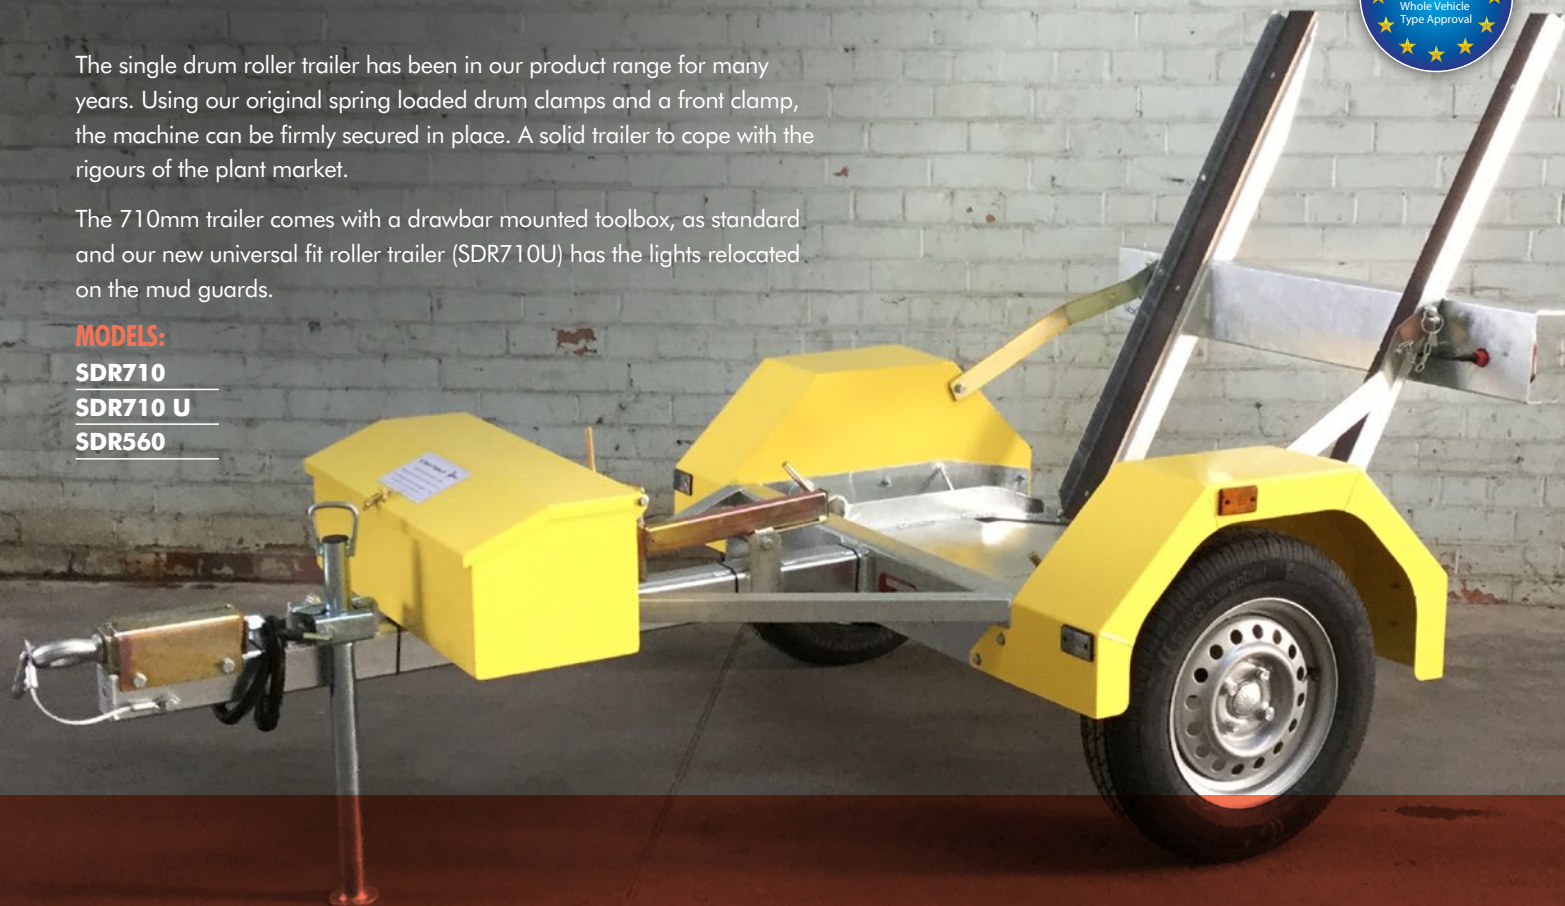

The 710mm trailer comes with a drawbar mounted toolbox, as standard and our new universal fit roller trailer (SDR710U) has the lights relocated on the mud guards.

TOILET PODS

Modular toilet blocks offer a static system for different applications and are transported by commercial vehicles and lifted into place by either Hiab, or forklift. No need for steps with these units.

Available from 8' to 20' at various widths, with lifting points either at the base or roof mounted.

Our toilet pods are suitable for running on mains, or a vacuum system, meaning clear water in the toilet bowl!

ENVIRONMENTAL AWARENESS

Taylor's Trailers Limited are committed to minimising the impact of our activities on the environment. We aim to raise our staff's awareness of environmental issues and to work at minimising their impact, both at work and outside of work.

Our key aims are:

- Minimise waste by re-using primarily and then re-cycling
- Minimise direct emissions by using efficient machinery and capturing any emissions with air filters
- Minimise emissions and our carbon footprint caused by our activities

Some actions we have, or are, carrying out:

- Replacing our diesel forklift with a gas forklift
- Re-using packaging from goods received on items we are dispatching, or storing
- Use of a re-cycling bin that now takes the bulk of our waste
- Installation of energy efficient LED lighting to cut down our electric consumption

- Only printing out essential documents
- Having good quality equipment that rarely needs replacing – such as hand tools
- Working with suppliers who are as committed to minimising their environmental impact
- Ordering bulk quantities from our suppliers to cut down on the number of deliveries to our premises

We also pride ourselves on manufacturing high quality and robust products that will last a long time (Some of our plant trailers are still being used over 20 years after being manufactured) – this must be better for the environment!

Should you have any questions, or suggestions, about Taylor's Trailers Limited and the environment, please do not hesitate to contact us.
